> summary

Software Engineer with 7+ years of commercial experience building distributed, high-availability JVM systems. Comfortable across the stack – from core backend services in Java and Spring to full-stack delivery with TypeScript and Node.js. Strong focus on system design, reliability and long-term maintainability.

> experience

Senior Java Software Engineer @ Alfa-Bank (Belarus) 04/2026 – present  
– Developing distributed systems in a regulated banking environment.

Senior Software Engineer (Backend / Full-Stack) @ Godel Technologies Europe 01/2019 – 04/2026

Outsourcing engineer embedded in cross-functional teams delivering high-load production systems for UK-based enterprise clients. Client names omitted under NDA; engagements described by industry domain.

04/2024 – 04/2026 – UK FinTech / Insurance domain

- Senior Full-Stack Engineer on four of the platform's customer-facing web applications; platform served ~10M monthly online users.
- Implemented frontend validation and client-side scripting; hardened web application security and improved accessibility compliance.
- Collaborated with product, QA and SRE to ship changes behind feature flags with contract and end-to-end tests.

01/2019 – 04/2024 – UK Energy Market domain

- Designed and developed distributed, microservices-based backend services handling a customer base of 2M+.
- Owned several core business domains end-to-end, from design to production support.
- Delivered high-availability services through containerized deployments and automated CI/CD pipelines.
- Integrated with third-party providers; designed monitoring dashboards, notification workflows and customer-facing email templates.

> education

Bachelor's degree, IT Engineer @ Brest State Technical University, Republic of Belarus 01/2007 – 12/2013

> stack

backend: Java 11/17/25, Spring (Boot, MVC, Data, Security)

web: TypeScript, JavaScript, Node.js, Express

data: PostgreSQL, MongoDB, Apache Cassandra, Liquibase

messaging: ActiveMQ  
infra: Docker, Kubernetes, Terraform, Jenkins, Puppet, Rundeck  
testing: JUnit, AssertJ, JBehave, Cucumber, Jest, Playwright  
observability: Grafana, Kibana, OpenSearch, Dynatrace, New Relic  
vcs: GitHub, GitLab, BitBucket  
ai tools: Cursor, Windsurf, Codex

> **certifications**

- AWS Certified Cloud Practitioner
- AWS Certified AI Practitioner
